## STRONG REMARKS

A few years ago, we made the conscientious decision to put ourselves in a position that whatever storm came our way, we would be prepared for it. Who would have predicted that storm would be COVID-19? While most of higher education is in turmoil, I am proud that State Tech is doing what we have always done and are doing it better than ever. We are preparing more students for profitable employment and a life of learning than we ever have. During this crisis, we are grateful for our outstanding students, employees, and supporters for keeping us the number one two-year College in the Country!

You will read in these pages about record enrollment, buildings under construction, and our outstanding students and alumni. It is the things we were able to do during a crisis, that I hope makes you as proud as I am to be associated with State Tech. We held one of the first in-person graduations in the Country last May. We are one of the few schools in the Country who can say we did not move one class to an online format this year because of COVID-19. Because of the efforts of our employees to grow the institution, we kept hiring when 500,000 faculty and staff have left higher education during COVID-19. State Tech is the fastest growing College in Missouri having grown over 50% in the last three years.

If you have not been back to Campus in a few years, I encourage you to do so. If you time it right, you might even be able to play 9-holes at the recently acquired Osage Country Club. I would love to show you around and back up why we say, "From the Classroom to Your Career, State Tech is the Employers' Choice."

- President Shawn Strong
